25+ YEARS IN PRODUCTION	100+ FEDRAMP-HIGH OPENSIFT CLUSTERS OPERATED	FedRAMP HIGH & MODERATE ATO	700+ NIST 800-53 CONTROLS EVALUATED
----------------------------	--	--------------------------------	--

SUMMARY

Principal SRE at Red Hat with 25+ years of enterprise infrastructure experience, specializing in FedRAMP High and Moderate compliance, cloud-native platform engineering, and security automation at scale. Deep expertise in OpenShift/Kubernetes, AWS GovCloud, Terraform IaC, and NIST 800-53 Rev 5 control implementation. Proven track record of building greenfield platforms, leading cross-functional teams, and delivering compliance-driven engineering across regulated federal environments. Currently architecting ROSA's FedRAMP Moderate control surface and AI-powered compliance automation tooling.

TECHNICAL SKILLS

▶ OpenShift / Kubernetes (CKA)	▶ FedRAMP High & Moderate ATO	▶ NIST 800-53 Rev 5
▶ AWS GovCloud / PrivateLink	▶ Terraform / Infrastructure as Code	▶ Splunk / Dynatrace / Grafana
▶ Python / Bash / Go	▶ CI/CD (Tekton, Jenkins, GitLab)	▶ Keycloak / IAM / SSO
▶ Claude AI / MCP / Agent SDK	▶ GitOps / Helm / Kustomize	▶ Incident Response / COMMON

EXPERIENCE

Red Hat

November 2021 – Present

PRINCIPAL SRE · PRINCIPAL SRE TEAM LEAD · SENIOR SRE – ROSA REGIONAL PLATFORM

Principal SRE (January 2026 – Present) · Principal SRE Team Lead (January 2025 – January 2026)

- Orchestrated FedRAMP Moderate compliance remediation for the ROSA Regional Platform, implementing 13+ NIST 800-53 Rev 5 controls across AU, AC, SC, SI, RA, IA, CA, and CP families; architected Thanos and Grafana observability suites via IaC across multi-cluster environments.
- Led FedRAMP Continuous Monitoring (CONMON) remediation, deploying compliance-monkey across Management Clusters to automate security auditing and ensure persistent adherence to federal baselines.
- Architected AWS PrivateLink support for ROSA Hosted Control Planes (HCP) across all GovCloud regions, enabling secure private network connectivity for sensitive federal workloads; delivered 10+ cross-functional HCP training sessions.
- Architected and deployed Dynatrace Managed Service across FedRAMP environments with OneAgent log forwarding; authored Significant Change Request (SCR) architecture diagrams to secure stakeholder approval for complex observability migrations.
- Built a fully automated FedRAMP audit system (Claude Sonnet sub-agent) evaluating ~800 NIST 800-53 controls across ROSA repositories, producing Jira tickets, GitHub PRs, and executive-summary PDFs per run; integrates Trivy CVE scanning to auto-downgrade Met controls on CRITICAL/HIGH findings.
- Validated FIPS compliance for OCP on EKS — confirming the Go binary dlopen dispatch path to host kernel flags — and collaborated with Red Hat cryptographic maintainers to implement hardcoded known-answer tests (KAT) for NIST SP 800-131A AES/RSA/ECDSA compliance.

Senior SRE Functional Lead (December 2023 – January 2025) · Senior SRE (November 2021 – December 2023)

- Led a team of 9 SREs; defined and drove agile epics aligned with business priorities — CVE mitigation, annual FedRAMP assessments, Significant Change Requests, and operational toil reduction.
- Deployed Red Hat build of Keycloak (RHBK) to production, authored six comprehensive FedRAMP Boundary Architecture Diagrams, and engineered real-time synthetic availability monitoring for the identity platform.
- Automated AWS Config, GuardDuty, and SecurityHub via Terraform, establishing a hardened FedRAMP security baseline; orchestrated platform-wide migration from PagerDuty to GoAlert, reducing incident response latency.
- Spearheaded production deployment of GoAlert as primary FedRAMP on-call platform (PoC → VPCE network architecture); authored the SSP Access Control validation epic for the ROSA Regional Platform.
- Built greenfield FedRAMP High GovCloud platform on AWS from scratch; led IaC initiative establishing Terraform as the provisioning foundation; delivered ATO workstreams including annual assessment support.
- Championed Transit Gateway hub-and-spoke topology for GovCloud, VPC Flow Logs global rollout, and WAF compliance audit across all high-compliance regions.

Fiserv

March 2017 – November 2021

SENIOR SYSTEM ENGINEER LEAD – CLOUD PLATFORM

- Designed and built 16 Pivotal Cloud Foundry foundations supporting 7,000+ microservices; designed and implemented Kubernetes solution into Azure using Pivotal Kubernetes Service (PKS/TKGI).
- Led the PaaS deployment of a Fiserv presence into Azure; presented at SpringOne 2019 on hybrid-cloud Terraform architecture. Authored Terraform solution for Azure enterprise infrastructure.
- Built a self-service Kubernetes cluster provisioning platform (web form → Git → pipeline → Helm-deployed Prometheus/Grafana stack + expiration cleanup); designed centralized SLI dashboards across 14 PAS foundations using Grafana, AlertManager, and Prometheus.
- Achieved Certified Kubernetes Administrator (CKA-2000-008308-0100) certification; formed and trained the Cloud Platform team using agile methodologies.

OneStream Software

February 2021 – November 2021

FIRST DEVOPS ENGINEER

- Migrated 70+ repositories from TFS to Azure DevOps; implemented SonarQube SAST scanning, GitFlow branch strategy, and Azure Pipelines CI/CD as the organization's founding DevOps engineer.

Grange Insurance

2006 – 2017 (with gap 2008)

SENIOR SYSTEM ENGINEER – EXCHANGE / ACTIVE DIRECTORY / MESSAGING

- Migrated 3,000 on-premise Exchange 2013 mailboxes to O365; administered 9-server Exchange 2003/2007/2013 environment; architected AD, ADFS, PKI, KMS, PeopleSoft GL integrations, and enterprise FTP platform.
- Built PowerShell and VB automation tooling including a New User Tool, nested AD group reporting, AD photo import pipeline, and SharePoint offboarding automation.

Earlier Roles

1998 – 2008

NETJETS (SR. NETWORK ADMIN) • BMW FINANCIAL (CRM ADMIN) • CARDINAL HEALTH (SR. MESSAGING ENGINEER)
• WD PARTNERS (IT ADMIN)

- 25+ years of progressive infrastructure experience spanning messaging, networking, virtualisation, enterprise AD/Exchange, and automation — from first ISP support role (BellSouth.net) through senior engineering leadership.

CERTIFICATIONS

Certified Kubernetes Administrator (CKA)	CKA-2000-008308-0100
Azure DevOps Engineer Expert (AZ-400)	December 2020
Azure Solutions Architect Expert (AZ-303/304)	October 2020
Azure Administrator Associate (AZ-104)	October 2020

EDUCATION & NOTABLE

Franklin University — Computer Science	Columbus, OH
Eagle Scout — Boy Scouts of America	Order of the Arrow
SpringOne 2019 Speaker	Pivotal Platform / Azure
Open Source Contributor	github.com/theautoroboto
